PROJECTS

Miracle Messages - Full-Stack (2020)

miraclemessages.org/impact

An interactive map showing where reunions have taken place as well as the loved ones with whom they were reunited.

- Collaborated with 4 full-stack team members during a 2-month build

TacoTaco - Back-End (2022)

tacotaco.danielmattox.com

An open API serving the TacoFancy data via https.

- Recently rewritten from MongoDB to MySQL

The Sorting Hat App - Front-End (2021)

magic.danielmattox.com

A flip-card UI cycles through questions & varies the color of a fluid meter through completion.

- Converted static CSS progress bar to a dynamic component
